

# NATURE'S LUXURY FLOORING

Where Sustainability Meets Style

NG CORK | CALAIS CREAM

NEW GENERATION  
CORK

**New Generation Cork combines the warmth and resilience of nature with modern convenience. Say goodbye to sanding, polishing and harmful chemicals and hello to elegant and hassle-free cork tiles!**

New Generation Cork offers a bespoke range of patterns and colours to fit any style while still maintaining all the benefits of cork. Featuring a luxurious Silky Satin finish, these pre-finished and pre-glued tiles use state of the art hot melt ceramic technology with UV water-based coatings to provide a superior finish for long-lasting floors.

# CORK HAS HAD A MAKEOVER

An extraordinary material now available in a range of coloured finishes, cork's unique features and benefits make it a top choice for practicality, style and eco-friendliness.

## **Exceptional Insulation and Comfort**

Warm underfoot in winter and cool in summer, cork flooring provides year-round comfort thanks to its insulating qualities. The natural cushioning property of cork provides relief to feet and joints, and offers resilience against furniture imprints, ensuring a long-lasting and pristine floor.

## **Enhanced Acoustic Qualities**

Enjoy peace and tranquillity with cork's unique sound dampening structure that minimises reverberation and noise transfer between rooms, creating a quiet atmosphere in even the busiest of spaces.

## **Sustainable and Eco-Friendly**

One of the few truly renewable resources, cork is not only highly sustainable but is also environmentally friendly. Cork bark is hand peeled from cork oak trees without damaging the tree.

Experience the natural beauty and benefits of cork, now in a contemporary array of patterns, colours and textures.

NG CORK | MADEIRA WHITE

NG CORK | CALAIS ALLOY

This practice of only harvesting the bark promotes tree health and contributes to carbon capture and storage. The bark is repeatedly regrown and harvested throughout the tree's lifespan, which can be up to 250 years.

### Hypoallergenic and Clean

Thanks to its anti-static nature and tight cellular structure, cork repels dust, pollen and allergens. Cleaning cork floors is easy – a regular sweep or damp mop is usually all that is required, saving time and hassle.

### Durable and Resistant

With high levels of naturally occurring suberin, cork repels water and is resistant to fire. Its inherent elasticity and resilience gives cork a durability akin to hardwood, making it ideal for high traffic areas and even wet spaces.

### Easy Installation

A fuss-free alternative to timber, cork can be quickly installed onto a variety of sub-floors including concrete, timber, ply, chipboard, plus many more.

## BENEFITS OF CORK

Comfortable Underfoot

High Density

Noise Reducing Properties

Thermal Regulating Properties

Anti-Slip Texture

Fire Retardant

Water Resistant

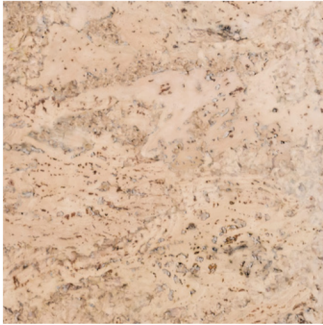

Hypoallergenic

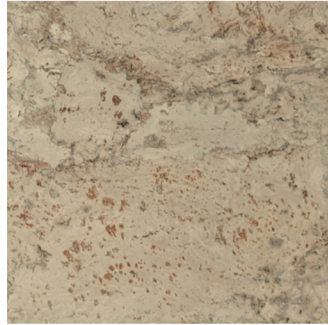

Environmentally Friendly

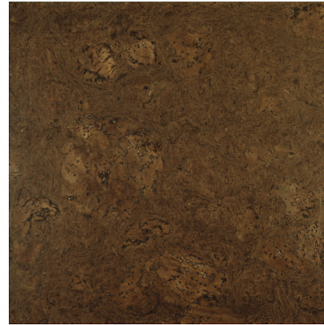

## NEW GENERATION CORK TILE RANGE (PRE-FINISHED)
